

## RINO TEXTILE MAX

The collection is made 100% of cotton with a flame retardant finish. It ensures protection against short-term contact with flames and radiant heat as well as small splashes of molten metal during welding work and allied processes.

### Jacket

- Provided with two open side pockets.
- Spots on the legs particularly exposed to the impact of molten metal splashes and mechanical damages are provided with an additional application made of a woven fabric.
- External seams made of flame retardant Kevlar® threads.
- Vulnerable spots strengthened with bar tacks.

The product meets general requirements for personal protective equipment provided in Regulation (UE) 2016/425 and in EN ISO 13688 and EN ISO 11611 Harmonized Standards.
