

## GOGGLE SG 271

Goggles SG 271 have been designed to ensure eye protection against impact of particles with medium energy (120 m/s) and interaction of liquid drops.

The goggles are equipped with super panoramic lens which ensures wide visual field.

Anti-fog and ventilation system protect goggles from evaporation.

Wide and durable elastic rubber allows regulation and optimal fitting to users head.

The goggles meet the requirements of the EU harmonization legislation: with Regulation (EU) 2016/425 and the harmonized standard EN 166.
