

EPA 200

ESD Male Apron

The EPA 200 model antistatic protective apron is capable of dispersing electrostatic charge to prevent incendiary discharges. The apron is also used in EPA zones for the production of electronic devices.

- The apron is fastened with hidden metal spring snaps.
- Provided with a chest-high left side open pocket and two front pockets.
- The sleeves, fastened with metal spring snaps, are modelled to increase the freedom of movements.
- Upon the customer's request, the apron can also be delivered in other colour versions.
- Designed particularly for industrial washing or rental.

The product meets basic requirements set for the personal protective equipment in Regulation (EU) 2016/425 and harmonized standards EN ISO 13688 and EN 1149-5 along with the requirements contained in standard EN 61340-5-1.
