

ANTYSTAT PETROLEUM NEW

The ANTYSTAT PETROLEUM collection is capable of dispersing electrostatic charge to prevent incendiary discharges. The static properties have been tested after 50 washing cycles. Furthermore, the fabric comes with a “wrinkle free” finish and high discolouration resistance. All Antystat Petroleum clothes are equipped with YKK® accessories; they guarantee both protection and high quality.

Jacket

- The jacket is closed with a YKK® zipper covered with a flap fastened with YKK® snaps.
- Provided with practical front pockets covered with flaps: two side open pockets and two chest height pockets.
- It has an extended back and special ergonomically designed sleeves.
- Areas exposed to tear are additionally reinforced with bar tacks in a contrastive colour.
- Contrastive colour stitchings contribute to the attractive appearance.
- At the customer's request, it can be delivered with various colour combinations and available materials. It can be additionally provided with 3M reflective tapes.

The product conforms to the relevant requirements of the EU harmonisation legislation: Regulation (EU) 2016/425, and meets the requirements of the standards: EN ISO 13688, EN 1149-5.
